

CIS 432/532 Introduction to Computer Networks
Fall 2002

Program #1 Survey

1. Identification

Print clearly.

Undergraduate

Graduate

Name

CS Username

2. Program Status

Check the boxes below to indicate which functions your program performs properly.

Functionality

Program compiles

Basic functionality: running your client with your server

Time command prints current time

Diff command prints difference since client last asked for time, in hours, minutes, and seconds using format specified in assignment

Quit command causes client to quit

Server handles multiple, simultaneous clients and tracks time and diff correctly for each

Interoperability: running your code with solution code

All parts of protocol, running your client with solution server

All parts of protocol, running solution client with your server

3. Comments

If your program doesn't work properly, please describe in more detail what is wrong. Use the back if you need more space. Also, if you used some special implementation then describe it here.
