2. Program Status

*Check the boxes below to indicate which functions your program performs properly.*

| Java | C | Functionality |
|------|---|---------------|
|------|---|---------------|

|                          |                          |                   |
|--------------------------|--------------------------|-------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Programs compile. |
|--------------------------|--------------------------|-------------------|

*Basic functionality: running your client with your server.*

|                          |                          |                   |
|--------------------------|--------------------------|-------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Uppercase letters |
|--------------------------|--------------------------|-------------------|

|                          |                          |                   |
|--------------------------|--------------------------|-------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Lowercase letters |
|--------------------------|--------------------------|-------------------|

|                          |                          |                  |
|--------------------------|--------------------------|------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Counting letters |
|--------------------------|--------------------------|------------------|

|                          |                          |                   |
|--------------------------|--------------------------|-------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Closing handshake |
|--------------------------|--------------------------|-------------------|

|                          |                          |                                  |
|--------------------------|--------------------------|----------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Error checking: invalid commands |
|--------------------------|--------------------------|----------------------------------|

|                          |                          |                               |
|--------------------------|--------------------------|-------------------------------|
| <input type="checkbox"/> | <input type="checkbox"/> | Error checking: missing colon |
|--------------------------|--------------------------|-------------------------------|

*Interoperability*

|                          |                          |   |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | All parts of protocol, running your client with solution server |
|--------------------------|--------------------------|---|

|                          |                          |   |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | All parts of protocol, running solution client with your server |
|--------------------------|--------------------------|---|

3. Comments

*If your program doesn't work properly, please describe in more detail what is wrong. Use the back if you need more space.*
